

MUHAMMAD AHMAD HASHAM

AI & Software Development Enthusiast | BS Artificial Intelligence Student

Rawalpindi, Punjab, Pakistan | +92 327 0222414 | hasham14fw@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio Website](#)

PROFESSIONAL SUMMARY

Motivated Artificial Intelligence undergraduate with hands-on experience building machine learning, NLP, and full-stack web applications. Skilled in developing retrieval-augmented generation systems, predictive models, and computer vision solutions, with a strong foundation in Python, JavaScript, and modern web frameworks. Proven leader and communicator with a track record of managing technical teams, delivering workshops, and driving community-funded projects.

EDUCATION

BS in Artificial Intelligence

2024 – 2028 (Expected)

Air University, Islamabad

- 4th semester completed; CGPA: 3.10 / 4.00

TECHNICAL SKILLS

Programming Languages: Python, C++, C#, JavaScript

Web Development: HTML5, CSS3, React.js, Node.js, Express.js, .NET Core

Databases: MySQL, MongoDB (Atlas), MS Access

AI & Machine Learning: Machine Learning, NLP, RAG Systems, Prompt Engineering, Generative AI

Tools & Platforms: Git/GitHub, VS Code, Google Colab, Figma, Canva

Deployment: Vercel, Render, Domain & Hosting Management

APIs: Twilio, Gemini, OpenWeather

EXPERIENCE

Remote Computer Operator

Landfinder81, Rawalpindi

- Managed the company database and led marketing efforts for a real estate platform, driving listing visibility and audience engagement.

Computer Lab In-Charge

Allama Iqbal Public School

- Maintained and troubleshooted computer lab infrastructure, providing technical support to students and staff to ensure uninterrupted learning.

PROJECTS

RAGTIME1 — Multilingual RAG System

- Built a retrieval-augmented generation system using BM25, E5, and BGE retrieval models with a GPT-4 tokenizer for semantic search, document retrieval, reranking, and context-aware answer generation.

Flood Risk Prediction & Management Agent

- Developed an AI-powered flood prediction agent using Random Forest and ensemble stacking models, integrated with Leaflet Maps for risk visualization and evacuation route planning.

AI Fake News Verifier

- Built an NLP-based fake news detection platform using TF-IDF, Random Forest, and ensemble stacking models to classify news credibility.

AIPS Integrated School Portal

- Designed and deployed a web platform supporting student and teacher portals with automated school announcements.

OpenCV AI Attendance System

- Created a computer-vision-based attendance solution enabling automated student recognition and real-time attendance tracking.

Foodlenz — Restaurant Trend Analytics

- Developed a review platform that tracks restaurant trends and delivers personalized dining suggestions based on user-shared experiences and behavioral analytics.

Master Solar Inventory DBMS

- Built an accounting and stock management system to handle high-volume solar equipment transactions with real-time reporting.

Automated Trading Bot

- Engineered a data-driven algorithmic trading bot that executes orders based on predefined strategies and market analytics.

LEADERSHIP & ACHIEVEMENTS

- Project In-Charge, Lodhran Pilot Project (UNICEF-funded initiative)
- Winner, Air University Debate Championship
- Elected Student Voice Leader (2022)
- Conducted technical workshops on Web Development and Modern Software Systems

MENTORSHIP & PUBLIC SPEAKING

Technical Workshop Instructor

- Delivered 3 highly-rated workshops on Modern Web Development Architecture, providing hands-on training for university cohorts in high-performance web frameworks and UI/UX best practices.

Public Discourse Specialist — Cross-Institutional Engagements

- Recognized across academic debates and technical talks for translating complex engineering concepts into high-impact presentations.

RESEARCH INTERESTS

- Artificial Intelligence & Machine Learning
- Deep Learning & Neural Networks
- Natural Language Processing (NLP) & Computer Vision
- Robotics & Automation

LANGUAGES

- English — Fluent
- Urdu — Native

CORE COMPETENCIES

- Complex Problem Solving — decomposing intricate technical challenges into scalable, manageable solutions
- Logical & Critical Reasoning — architectural thinking with a focus on data-driven decision-making
- Strategic Research — rapidly assimilating emerging technologies to bridge AI theory and practical implementation
- Cross-Functional Teamwork — collaborating with developers, stakeholders, and students to achieve shared milestones
- Effective Communication — articulating complex technical concepts to non-technical audiences through workshops and talks
